- 58. Install Gutters

STEP 12: Final

- 59. Touch Ups
- 60. Install Appliances
- 61. *Final Inspection & Occupancy Permit

STEP 13: Move In and Enjoy Your New Home!

SELECTIONS

The following is a list of common interior and exterior fixtures and finishes that will need to be selected for most residential projects. We can provide samples to help reduce the searching process and keep the project within budget.

Exterior Finishes

During the design process we will develop a computer model and exterior elevations of the house. These will give us a clear idea of what the home is going to look like and help us make exterior material decisions.

Plumbing Fixtures

We will provide you with a floor plan showing fixture locations. We will also provide a plumbing selections page for you to choose fixtures.

Electrical Fixtures

The amount of electrical fixture options can be a bit daunting. It is easy to get overwhelmed with the many options. Keep it simple! Make your statement with just a couple of accent fixtures. During the design process we will work with you to develop an electrical plan to show lighting types and locations.

Appliances

Remember that you need to select your appliances before the cabinets can be finalized.

Cabinets

During the design process we will develop interior elevation drawings so that all of your cabinets get built just the way you want them.

Countertops

We find that selecting a countertop is a balancing act between looks and function. Our supplier, The Granite Shop, has a full showroom for you to explore and see various counter material.

Door Hardware

Think simple and keep it the same throughout the house.

Flooring

There are a lot of new and exciting options for flooring. Engineered vinyl plank is 100% waterproof, while providing the great look of wood and is complimented by an extremely durable surface. Carpet for the bedrooms and stairs is always a great option and provides the sense of “home”.

Tile

Often porcelain, ceramic tile, or natural stone can be used to great effect. Remember tile for bathroom floors, showers, and kitchen backsplash.
